Consent for Telehealth Visits

We offer unique dental treatment options that are not offered by most other offices. As such, we offer telehealth consultations for patients living far away who are considering coming to our office.

At the telehealth visit(s), Dr. Nick Calcaterra will review your medical history and your dental history – including your specific dental needs. The ultimate goal is to determine whether you can be treated in person at our office in Orange, CT.

I certify that I understand and agree to the following:

- This consultation is not a dental exam. Dr. Nick Calcaterra will not be able to look into my mouth. He can review x-rays sent to him and ask you questions. But he is unable to reach definitive dental diagnoses with this consultation alone.
- This session is not covered by insurance. I understand the fee is \$150 and Calcaterra Family Dentistry will not be submitting any dental nor medical claim for this visit on my behalf.
- I understand that, depending upon the complexity of my dental needs, additional telehealth visits and/or an in-person consultation may still be required.
- I understand that if Dr. Nick Calcaterra determines I am not a good candidate for in-person treatment at his office, the fee paid for the consultation is not refundable.
